My name is Angel Henrietta Aboah. I am a computer engineer from Ukraine living in Kolding and I wish to apply for the desired position mentioned in your job posting. Throughout my career, I have worked closely with computer networks systems and security as well as computer architectures. As a computer engineer, I design, test and maintain computer systems, research software and computer hardware, design and test computer hardware components, such as processors, circuit boards, memory devices and routers; design, set up and test networks, manage operating systems and troubleshoot any concerns with software etc. I have also worked with several operating systems like windows and Linux. I have basic knowledge of programming languages like HTML, CSS, JavaScript, C, python etc.

Incorporated with my knowledge, I know the basic tools of website creativity since I have one which I created on Wordpress. I am also a social media content creator so I know basic editing tools for videos and pictures. I am a social butterfly so I keep myself busy with knowing updated social media platforms' algorithms. In addition to the mentioned abilities, I am well acquainted with Ms. office packages and Sharepoint.

Furthermore, I have participated in quite a few practical trainings and internships over the years and working throughout on various computer network systems have broadened my knowledge enough to now fully indulge as a full time computer engineer. The practical trainings over the years which I participated in have been programs organized by the university I attended. These were seasonal programs and I did them as a full time student.

While I was an intern at the university, I worked on the administration and operation of computer network systems, investigations and design of computer systems and networks, mathematical software of computer systems and networks, data warehousing and information network systems comprehensive security etc. Additionally, I completed an industrial internship at the university which is also vital for a company like yours.

I haven't indulged in a full time employment because it has always been a vision of mine to complete my education to a master level before having a full time employment. I see this as a great opportunity to expand my skills in the digital world. Also I would love to be a part of your company's vision and I am with the strong belief of fully instilling my capabilities to its potential if employed.

At the moment, I volunteer at the Simon Peter Kirke here in Kolding and I'm an active go-maker in the programs at the Sprogcafe and "Kvinder Møde Kvinder" women's program. I help out in the educational programs and technical issues both external and internal.

Also, I am a volunteer at the "morgen stjerne Cafe" in Christiansfeld and assist with the customer support and technical issues there.

Moreover, I have analytical and good collaboration skills, a great problem solver, excellent communication skill, attention to detail and proper learning skills, adaptability planning and organizational skill and have the ability to work in teams.

Additionally, I am fluent in both written and spoken English and have a great knowledge of conversational Danish. I'm open to work both on-site and remotely. I love to challenge myself especially when it comes to experiencing new technologies or tasks and I see this as a great opportunity to exhibit my capabilities. I hope I am given the opportunity to be put up to the task. I look forward to hearing from you.

Best regards,

Angel
